SERIES: 24969

3

TITLE: Boreal Toad management and research records

DATES: ca. 1995-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 1.00 cubic foot.

DESCRIPTION:

These records document the agency's role in this multi-agency effort to assist in the recovery of this species under the Boreal Toad Conservation Agreement and Strategy, created jointly by the involved agencies. The Boreal Toad has been identified under the State Conservation Species Program as an aquatic species which is threatened but does not yet qualify for assistance and protection under the Federal Endangered Species Act (50 CFR 17). Agencies participating in this program are State Wildlife Resources, Federal Fish and Wildlife Service, Federal Bureau of Reclamation, Federal Bureau of Land Management, local conservation districts and the biology departments of some local universities. Agency responsibilities in this program include assessment of the current environmental survival situation for this species; monitoring of population growth, including reproduction; habitat enhancement; genetic research; and notable predators. Records include meeting summaries documenting interaction with other agencies and interested parties, research proposals and results, correspondence and work on specific areas within the project.

RETENTION:

Permanent. Retain for 32 year(s)

DISPOSITION:

Transfer to Archives.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 05/2003

FORMAT MANAGEMENT:

Paper: Retain in Office for 2 years and then transfer to State Records Center. Retain in State Records Center for 30 years and then transfer to State Archives with authority to weed.

3

TITLE: Colorado River fish management and research records

DATES: ca. 1995-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 1.00 cubic foot.

DESCRIPTION:

These are records documenting the agency's participation in projects funded by the Upper Colorado River Recovery Implementation Program. The program works along the Colorado River system to enhance the preservation of habitat for and recovery of the Humpback Chub, Bonytail, Colorado Pikeminnow, and the Razorback Sucker. The Upper Colorado River Recovery Implementation Program is Denver based joint effort managed by the Federal Fish and Wildlife Service. Other participating agencies include the Federal Bureau of Reclamation, Federal Bureau of Land Management, the Utah Reclamation and Mitigation Conservation Commission, local water conservancy groups and the biology departments of some area universities. Program activities include monitoring the species, habitat enhancement, genetic research, stocking and hatchery propagation. Types of records included are summaries of meetings with other participating agencies, comments on draft documents from peer reviews, correspondence about meetings or field trips and work on specific projects within the program.

TITLE: Cutthroat Trout management and research records

DATES: ca. 1995-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 1.00 cubic foot.

DESCRIPTION:

These records document projects implemented for the recovery of Bonneville Cutthroat Trout in Utah. Species of Cutthroat Trout in Utah are Bonneville, Colorado and Bear Lake Cutthroat Trout. The Bonneville cutthroat trout has been identified under the State Conservation Species Program as an aquatic species which is threatened but does not yet qualify for assistance and protection under the Federal Endangered Species Act (50 CFR 17). The goal of the program is to provide assistance to selected aquatic species to enhance survival possibilities and preclude becoming an endangered species. This records series documents the current environmental survival situation for this species, as well as plans for recovery, interaction with other involved agencies and interested parties, research proposals and results, and monitoring projects. Monitoring projects document population growth, including reproduction; health of species population; genetic research; efforts at habitat enhancement; and notable predators, both natural and otherwise. Also includes correspondence and meeting summaries documenting interaction with other agencies and interested parties. Examples of agencies and interested parties are Wildlife Resources offices, universities and university professors, Federal Fish and Wildlife Service, Federal Bureau of Reclamation, Federal Bureau of Land Management, local conservation districts, special interest groups, major water users and private citizens.

3

TITLE: Fish hatchery maintenance and construction records

DATES: ca. 2000-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 2.00 cubic feet.

DESCRIPTION:

These records document the construction and maintenance of state-owned fish hatcheries. The hatcheries are operated by the Division for the production and distribution of fish to enhance sport fishing opportunities in the state. They are inspected to verify that industry standards are being adhered to, with particular attention paid to disease prevention and the exclusion of parasites. As per UCA 23-15-14, repairs and replacement of facilities and equipment at hatcheries are funded through the restricted account within the General Fund known as the State Fish Hatchery Maintenance Account. Included are contracts, change orders, correspondence, facility plans and specifications, meeting notes studies, environmental assessments, environmental impact statements, wetland delineations, cost estimates and invoice payment records.

TITLE: San Juan River fish management and research records

DATES: ca. 1997-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 1.00 cubic foot.

DESCRIPTION:

These are records documenting the agency's participation in projects funded by the San Juan River Recovery Implementation Program. The program works along the San Juan River system to enhance the preservation of native aquatic species, with particular emphasis on habitats that have been broken up by dams constructed on the river. In Utah, much of the San Juan River flows through Native American tribal lands, requiring negotiations with tribal representatives for access to the river and performance of program activities. The San Juan River Recovery Implementation Program is a New Mexico based joint effort managed by the Federal Fish and Wildlife Service. Other participating agencies include the Federal Bureau of Reclamation, Federal Bureau of Land Management, the Utah Reclamation and Mitigation Conservation Commission, local water conservancy groups and the biology departments of some area universities. Program activities include monitoring the species, habitat enhancement, genetic research, stocking and hatchery propagation. Types of records included are summaries of meetings with the other participating agencies, comments on draft documents from peer reviews, correspondence about meetings or field trips, work on specific projects within the program and documentation of negotiations with Native American tribal representatives.

RETENTION:

Permanent. Retain for 32 year(s)

DISPOSITION:

Transfer to Archives.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 05/2003

AGENCY: Department of Natural Resources. Division of Wildlife Resources. Aquatics Section

SERIES: 24977

TITLE: San Juan River fish management and research records

(continued)

FORMAT MANAGEMENT:

Paper: Retain in Office for 2 years and then transfer to State Records Center. Retain in State Records Center for 30 years and then transfer to State Archives with authority to weed.

APPRAISAL:

These records have administrative, and/or historical value(s).
This appraisal is based upon the value of these records to researchers.

PRIMARY DESIGNATION:

Protected UCA 63G-2-305 (26)(2008).

AGENCY: Department of Natural Resources. Division of Wildlife Resources. Aquatics Section

SERIES: 21968

3

TITLE: Sensitive native species records

DATES: 1975-

ARRANGEMENT: Taxonomically by category, thereunder alphabetical by species.

ANNUAL ACCUMULATION: 0.50 cubic feet.

DESCRIPTION:

This record series contains data pertaining to species listed in the Utah Sensitive Species List. State and federal wildlife and land management agencies, universities, and contractors collect the information which is used to determine species status and management needs. Information includes distribution locations, maps, radio telemetry information, productivity information, monitoring guidelines, management plans, biological survey information, life history information and habitat requirements.

RETENTION:

Permanent. Retain for 40 year(s)

DISPOSITION:

Transfer to Archives.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 09/1999

FORMAT MANAGEMENT:

Paper: Retain in Office for 5 years and then transfer to State Records Center. Retain in State Records Center for 35 years and then transfer to State Archives with authority to weed.

APPRAISAL:

These records have administrative, historical, and/or legal value(s). This disposition is based on the historical value of the records for study and research regarding sensitive species and the activities of the agencies involved in preserving these species. These records also have administrative and legal value. UCA 23 (1999) is the state statute and 50 CFR (1999) is the federal law governing the Division of Wildlife Resources.

AGENCY: Department of Natural Resources. Division of Wildlife Resources. Aquatics Section

SERIES: 21968

TITLE: Sensitive native species records

(continued)

PRIMARY DESIGNATION:

Protected

UCA 63G-2-305 (26) (2008). Special studies and time-bound projects, radio telemetry frequencies, specific adult and egg mass locality information within an area smaller than 247 acres.

SECONDARY DESIGNATION(S):

Public.

UCA 63G-2-301(2008). Information not deemed to threaten species if released.

AGENCY: Department of Natural Resources. Division of Wildlife Resources. Aquatics Section

SERIES: 22556

3

TITLE: Spotted frog reports

DATES: 1991-

ARRANGEMENT: Chronological.

DESCRIPTION:

This series contains reports about the spotted frog with information pertaining to distribution, conservation, habitat, translocation, population, study area, methods, and management recommendations.

RETENTION:

Permanent. Retain until administrative need ends

DISPOSITION:

Transfer to Archives.

RETENTION AND DISPOSITION AUTHORIZATION:

These records are in Archives' permanent custody.

FORMAT MANAGEMENT:

Paper: Retain in State Archives permanently with authority to weed.

APPRAISAL:

These records have administrative, and/or historical value(s).
These records have historical value as they track reports of an endangered species.

PRIMARY DESIGNATION:

Public

AGENCY: Department of Natural Resources. Division of Wildlife Resources. Aquatics Section

SERIES: 21969

3

TITLE: Threatened, endangered, and candidate species records

DATES: 1975-

ARRANGEMENT: Taxonomically by category, thereunder alphabetical by species.

ANNUAL ACCUMULATION: 0.50 cubic feet.

DESCRIPTION:

This record series contains data pertaining to species that are federally listed or proposed as threatened, endangered, or candidate species. State and federal wildlife and land management agencies, universities, and contractors collect information which is used to determine species status and management needs. Information includes distribution locations, maps, radio telemetry information, productivity information, monitoring guidelines, management plans, biological survey information, life history information and habitat requirements.

TITLE: Tissue collection identification files

DATES: 1967-

ARRANGEMENT: Chronological

ANNUAL ACCUMULATION: 0.10 cubic feet.

DESCRIPTION:

Lab reports. Information includes tissue type, possible problems, fixation types, stain type to use, person who collected histology (fish tissue), and initials.

These records are kept by the agency to document tests done on fish tissue in order to detect problems. Selected samples are sent to the lab and tests are requested for various reasons.

These are records of lab studies on fish.

RETENTION:

Retain until administrative need ends

DISPOSITION:

Destroy.

RETENTION AND DISPOSITION AUTHORIZATION:

Retention and disposition for this series were specifically approved by the State Records Committee.

APPROVED: 07/2001

FORMAT MANAGEMENT:

Paper: Retain in Office until administrative need ends and then destroy.

Computer data files: Retain in Office until updated and then delete.

Artifacts: Retain in Office until administrative need ends and then destroy.

3

TITLE: Virgin River fishes management and research records

DATES: ca. 1990-

ARRANGEMENT: Chronological by year, thereunder alphabetical by subject

ANNUAL ACCUMULATION: 1.00 cubic foot.

DESCRIPTION:

These records document the agency's role in projects funded by the Virgin River Resource Management and Recovery Program, a multi-agency effort focused on the recovery and restoration of the habitat for species of fish that are federally listed as threatened or endangered, or listed with the state as a conservation species. Examples of species studied and assisted as a part of this program are the Virgin Spinedace, the Virgin River Chub, and the Woundfin. Other participating agencies are State Wildlife Resources, Federal Fish and Wildlife Service, Federal Bureau of Reclamation, Federal Bureau of Land Management, local conservation districts and the biology departments of some local universities. Agency responsibilities include monitoring projects documenting population growth, including reproduction; health of species population; genetic research; study of predators, natural and otherwise; and habitat enhancement. Records include meeting summaries documenting interaction with other agencies, research proposals and results, correspondence and work on specific areas within the project.

SERIES: 13894

3

TITLE: Water body classification records

DATES: 1975-

ARRANGEMENT: Geographical by body of water type

ANNUAL ACCUMULATION: 0.10 cubic feet.

DESCRIPTION:

These records document the evaluation of bodies of water regarding wildlife habitats, water quality, type of body (lake, stream, etc.), in order to monitor the ecosystem of the state's aquatic wildlife resources and habitats. Information includes lab results, reports, field studies, and evaluation criteria matrices. These records assist the agency in detecting trends, foreseeing problems, and determining where intervention is needed.
